~~DESIGN~~  
& CONFLICT

The number 13 evokes conflicting emotions: for some people it is unlucky, for others – totally the opposite. That's why it goes so well with this year's topic of our birthday: **CONFLICT**. This is one of the most frequently used words these days, both in the media and in private conversations. We all feel we live in the times of crisis and climax. And yet, conflicts have been with us for ever. Maybe we were lulled by the naïve belief that there is nothing but progress and development around us? In the meantime, conflicts were growing up swept under the carpet of political correctness, and the creeping demons from the past were breeding alongside.

What does it all have to do with design, usually associated with free markets and aspiration for a better and cooler life? To some extent, design itself contributed to the dramatic growth of contrasts: poverty and wealth, consumerism and sustainability, comfort and care for the natural environment – any many others. However, the culprit is also able to create tools that will help solve the conflicts of the modern world, or at least mitigate their social consequences. **LET'S TALK** – we must listen to each other. **LET'S OPEN OUR EYES** – we must see. **LET'S NOT BE AFRAID** – we must control our emotions. **LET'S LEARN** to make use of the conflicts and turn them into a creative force.

Visit us in Cieszyn on 26-28 January 2018.

zamek cieszyn
